

# Marttinen's nature path

The Marttinen's nature path (1 km) is easy to navigate. The 10 boards on the way present both the nature and traditions and culture of the region.

Marttinen island has a variety of nature: shady spruce area, mixed forests under old pines and spruces, and lush hardwood forests. Herraskoski and the backwater above it with bird towers are wonderful water natural destinations.

The nature path starts behind Old Vicarage. It is marked in the forest with blue dots. The nature path has a theme that changes every 2 months.

On the entrance of the main building, you can take a task paper with nature-related tasks for children, related to each theme.
